

Liubov Eralieva

PRODUCT ANALYST | DATA ANALYST

Valencia, Spain | +34 633 958 480 | hloistone@gmail.com | linkedin.com/in/liubov-eralieva | Open to remote opportunities

PROFESSIONAL SUMMARY

Product / Data Analyst with 5+ years of experience in product, commercial, and marketing analytics, including 2+ years in dedicated product analytics. Use SQL, SQL Server, Oracle DWH / OLAP cubes, Microsoft Excel, Power BI, and Python / pandas to analyze user behavior, customer segmentation, churn, funnels, conversion, sales, revenue / GMV, promotions, and product performance.

Design and analyze A/B tests using hypothesis testing, sample size, statistical power, MDE, p-values, confidence intervals, and effect sizes. Build KPI reporting and regression / forecasting models, translating findings into actions that support revenue and commercial performance. Seeking a Product / Data Analyst role where I can apply product, commercial, and experimentation analytics to improve monetization, revenue, and customer decision-making.

PROFESSIONAL EXPERIENCE

Freelance / Contract Analytics | Data / Product Analyst | Jun 2025 - Present

- Analyze product and customer behavior across funnels, cohorts, retention / churn, conversion, segmentation, GMV, and revenue to support product and commercial decisions.
- Define KPI frameworks and business hypotheses, run exploratory data analysis (EDA) and data-quality checks, and assess metric impact on business outcomes to improve decision quality.
- Design and analyze A/B tests, interpret statistical significance and effect sizes, and translate results into stakeholder recommendations for evidence-based experiment decisions.
- Build recurring reporting and dashboards in Microsoft Excel, Power BI, and Python / pandas to track product and commercial KPIs.

Faberlic | Product Analyst | May 2023 - May 2025

- Analyzed sales, revenue, customer activity, promotions, and product performance across CIS markets, Mexico, and previously the U.S. to support revenue-focused commercial decisions.
- Prepared and validated large-scale historical datasets in Oracle DWH and analytical / OLAP cubes covering company activity since launch, ensuring reliable recurring and ad hoc analysis.
- Maintained 8 recurring analytical reports and automated 3 weekly reports in Microsoft Excel, Power Query, Power Pivot, and DAX, cutting manual preparation effort and reporting turnaround time.
- Quantified the impact of new promotions, campaign launches, and market initiatives on revenue, sales, and customer activity, translating results into recommendations for product and commercial teams.

CMT-Fitness | Marketing Analyst | Jan 2020 - Dec 2022

- Analyzed customer engagement, attendance, sales, conversion, and behavioral segments to drive improvements in client activity and commercial performance.
- Segmented customers by behavioral patterns and translated findings into recommendations for more targeted marketing and service decisions.

Decathlon | Marketing Manager | Jan 2019 - Apr 2019

- Managed revenue reporting and analyzed data for sales forecasting and product monitoring to support commercial planning and cross-functional decisions.

TECHNICAL SKILLS

- **SQL & Data:** SQL, SQL Server, Oracle DWH, analytical / OLAP cubes, fact and dimension tables, JOINS, aggregations, data preparation, data validation, large-scale historical datasets, exploratory data analysis (EDA), ad hoc analysis.
- **Product & Commercial Analytics:** user behavior analysis, customer segmentation, churn analysis, funnels, cohorts, conversion, sales analysis, revenue / GMV, promotion analytics, revenue impact assessment, campaign analysis, KPI frameworks, commercial metrics, multi-market analysis.
- **BI & Microsoft Excel:** Microsoft Excel (advanced), Power Query, Power Pivot, DAX, Power BI, dashboards, data visualization, recurring analytical reporting, reporting automation.
- **A/B Testing & Statistics:** A/B test design and analysis, hypothesis testing, sample size, statistical power, minimum detectable effect (MDE), p-values, confidence intervals, effect sizes, statistical significance, SRM and peeking checks, regression analysis.
- **Python & Forecasting:** Python, pandas, data analysis, regression analysis, sales forecasting concepts, baseline forecasting models developed in Data Science projects.

EDUCATION & TRAINING

Yandex Practicum | Data Science | May 2022 - Feb 2023

GoPractice | SQL for Product Analytics | Feb 2024
